

Nautobot Enterprise: Advanced Self-managed Network Automation to Scale with Confidence

Everything in Professional, plus OS Upgrades, Operational Compliance, Reports, and integrated AI to execute change with control, validate outcomes, and retain audit-ready proof.

Nautobot Enterprise is the advanced commercial edition of Nautobot from Network to Code, built for organizations that need more than foundational automation. It includes everything in Professional and adds automated report generation & delivery, advanced automation workflows for multi-vendor OS upgrades, Operational Compliance, and continuous validation. Deploy Nautobot Enterprise on-premises or in your own cloud to keep full control of your environment, data, and automation workflows.

KEY CAPABILITIES

BUILT ON PROFESSIONAL

Start with discovery, dashboards, and operational tools, with all Professional capabilities included.

OS UPGRADES

Automate OS upgrades with standardized workflows that reduce operational risk.

OPERATIONAL COMPLIANCE

Validate network state before and after change, detect drift, and retain historical results.

NAUTOBOT REPORTS

Create and publish professional reports straight from Nautobot and automate the distribution.

NAUTOBOT AI

Use AI tools and developer workflows via MCP Server and VS Code integration.

ENTERPRISE SUPPORT

24x7 ticketing, scheduled touchpoints, and guidance from the team behind Nautobot.

WHO IT'S FOR

Nautobot Enterprise is built for organizations that need to standardize change, reduce risk, validate outcomes, and maintain audit-ready proof across their network. With enterprise-grade capabilities, governance controls, and scalable automation, teams can operate with confidence at scale.

- >>> NetOps teams managing complex, multi-vendor networks
- >>> Orgs scaling from basic automation to structured, advanced workflows
- >>> Teams that need pre/post-change validation, operational drift detection, and audit-ready proof
- >>> Enterprises with self-managed, regulated, or security-driven deployment requirements

It is a great product and it can be easily integrated with the network infrastructure.”

ENGINEER - FINANCE (NON-BANKING)

Every experience I have had with Nautobot and the team behind it has been world class. The features they are bringing into Nautobot are unlike their competitors.”

ENGINEER - IT SERVICES

HOW IT WORKS

DEPLOY

Run Nautobot on-prem or in your cloud

DISCOVER

Identify devices & onboard inventory

EXECUTE

Run OS Upgrades & advanced automations

VALIDATE

Check, detect, and retain evidence

COMPARE NAUTOBOT DEPLOYMENT OPTIONS

Capability	Community	Professional	Enterprise	Cloud
Best Fit Select the right Nautobot edition based on your current needs and future goals	Teams exploring Nautobot and building initial workflows	Teams building their enterprise automation foundation	Teams requiring advanced automation and compliance	Teams prioritizing speed, scale, and minimal operational overhead
Deployment Model Flexible deployment options aligned to your infrastructure and governance requirements	Self-Managed (on-prem/your cloud)	Self-Managed (on-prem/your cloud)	Self-Managed (on-prem/your cloud)	Fully managed SaaS
Open Source Apps Access a broad ecosystem of free, NTC-maintained Nautobot applications	✓	✓	✓	✓
Expert Support 24x7 support with direct access to experts, plus maintenance and upgrade assistance	✗	✓	✓	✓
Network Discovery & Onboarding Automatically discover devices, uncover unknown assets, and onboard them into Nautobot	✗	✓	✓	✓
Ansible Integration Execute Ansible Automation Platform (AAP) and AWX jobs directly within Nautobot	✗	✓	✓	✓

ADVANCED NETWORK AUTOMATION BUILT FOR CONTROL, COMPLIANCE, AND SCALE

Nautobot Enterprise is built for teams that need more than foundational automation. It delivers the advanced capabilities to standardize complex workflows, automate multi-vendor OS upgrades, validate operational state before and after change, and maintain continuous compliance with the control and proof needed to operate with confidence.

When network automation becomes essential to speed, consistency, and risk reduction, Nautobot Enterprise helps your team execute advanced automation in your own environment—at scale, with control.
